

Why have a Green Schools Online Website?

Here's what schools say are the top ten reasons for using Green Schools Online

1. **Bespoke designs**

It's important that your website is attractive, professional and reflects your schools' ethos and values. One that showcases the school and its' achievements. Only GSO offers such a bespoke service at such low prices. We won't embarrass you.

2. **Carbon Zero**

The sustainability of everything is increasingly important to everyone. Rest assured that both our activities in creating your website nor its' ongoing operation are Carbon Zero.

3. **Pricing**

You need to ensure value for money, with no nasty extras and no silly charges for changing one word. Our pricing is transparent, up front and there are no hidden extras.

4. **Support**

Our support is simply the best. As the core of our sustainable relationships strategy, the success of your website is an absolute priority for us. Our support is unlimited, and you can talk to a real person on the phone.

5. **Content Management**

You want to be able to update your website with no special software and no special technical knowledge. Quickly and easily. It's so easy to update a GSO website, you could get addicted!

6. **Advice**

Our experts know a thing or two about websites. And many have also worked in Education. We can get your website off the ground with suggested menus and pages, helpful tips and will make the whole process as painless as possible.

7. **Photo Galleries**

Our animated photo galleries are just brilliant! Visitors

can sit back and watch the slideshow or view thumbnails and jump around. A little animation really makes them stand out.

8. **News & Diary events**

Add a diary or news event once and watch it display across the site in the latest news or latest events boxes.

9. **Version control**

Don't you wish everything you did had a rewind button? Well, we can't help with your Friday night out, but you can change anything on your website and not worry about 'messing things up'. So experiment!

10. **Flexibility**

You name it, we're not phased by it. After all, it's your website.

11. **No limits**

Why enter into a limiting arrangement? You can create unlimited pages and (unusually for a CMS) unlimited menus. You can upload unlimited files, photos and videos.

Okay, so there's 11!

“ The CMS is easy to master and enables even the most technophobic of staff to make updates. I would recommend the services of GSO because they are genuinely interested in giving you what you want. ”
